Weekly  
Roundup

WR 10-88  
March 9, 1988

The Foreign Agricultural Service of the U.S. Department of Agriculture today reported the following developments in world agriculture and trade.

## GRAIN AND FEED

THAILAND's Corn Export Forecast Reduced Further. Rising feed use combined with smaller crops have contributed to a continued decline in Thailand's exportable corn supply. Domestic production has fallen 50 percent from 5.4 million tons in 1985 (the highest level in this decade) to an estimated 2.74 million tons in 1987. According to the U.S. agricultural attache in Thailand, domestic use is forecast to rise 40 percent to 1.8 million tons during this same time period. Exportable corn supplies may drop to 850,000 tons, which is about 30 percent of last year's exports of 2.5 million tons. Traditional Thai markets, such as Malaysia and South Korea, may continue to seek U.S. corn to fill their needs.

SPAIN Exporting More Barley. The United States-European Community (EC) enlargement agreement has been completed with EC purchases of 300,000 tons of sorghum. Recent sorghum sales of 100,000 tons by Argentina and 200,000 by the United States fulfilled the EC-mandated sorghum purchase requirements.

This imported sorghum will add to Spain's surplus feed grain situation, which in turn has led to expanding Spanish barley exports. The EC recently raised its Spanish barley export tender by 300,000 tons; Spain has exported nearly 1 million tons of barley in the first five months of this marketing year. In 1986/87, Spain exported no barley. Barley exports by the EC-12 are now running 1 million tons more than at this time last year because of the increased Spanish exports. In 1985/86, just prior to joining the EC, Spain exported 1.9 million tons of barley into world markets.

## OILSEEDS AND PRODUCTS

AUSTRIA Continues Subsidizing Oilseeds. The Government of Austria continues to subsidize oilseed production to reduce oilseed meal imports and to reduce the area Austrian farmers plant in grain. Austria currently produces sufficient quantities of oilseeds for domestic vegetable oil demand, but quantities are insufficient for domestic oilseed meal demand. Both meal and oil imports are expected to decline in 1988 as Austria's first crushing facility becomes operational (roughly 150,000 tons will be crushed this year). The government is anticipating surpluses of rapeseed oil, so the Agricultural Ministry is researching the possibility of using rapeseed oil for tractor fuel.

This year, the Austrian government did not succeed in removing vegetable oils and margarine from General Agreement on Tariffs and Trade (GATT) bindings. However, operating losses from a new crushing facility are expected to cause financial burdens on the government, so new plans to finance oilseed policies or block imports are expected.

\*\*\*\*\*

FRANCE Exports Two-thirds of its Rapeseed Oil Output. France exported two-thirds, or about 236,000 tons, of its edible rapeseed oil production in 1987. Rapeseed oil constitutes 40 percent of France's edible vegetable oil output, but French consumers use only about 15 percent of France's rapeseed oil.

The EC consumes all of the rapeseed meal it produces, but since rapeseed oil is not widely accepted by consumers, the EC exports its surplus rapeseed oil with subsidies. Although subsidies are provided for both rapeseed exporting and crushing, EC policies favor rapeseed crushing in order to reduce dependence on protein imports, which represent 80 percent of protein consumption in the EC.

#### DAIRY, LIVESTOCK AND POULTRY

Hog Breeding Numbers Down in THE NETHERLANDS. The Netherlands' hog census of Dec. 1, 1987 shows sow numbers are down 4.4 percent to 1.6 million. This is the first drop in sow numbers since 1981. Total hog numbers were up 1.2 percent to 14.23 million compared to a 10.6-percent increase last year. The drop in sow numbers and the even larger 9.3-percent drop in gilts for breeding seem to indicate a slowdown in Dutch pork production.

#### CREDIT NOTES

Public Law 480, Title I Agreement Signed With KENYA. On February 26, officials of the United States and Kenya signed a \$5-million Public Law 480, Title I agreement that will provide approximately 45,000 tons of wheat on convertible local currency credit terms.

\*\*\*\*\*

Public Law 480, Title I Agreement Signed With SUDAN. On February 28, officials of the United States and Sudan signed a \$40-million Public Law 480, Title I agreement that will provide, on convertible local currency credit terms, approximately 186,000 tons of wheat valued at \$22 million, about 50,000 tons of wheat flour valued at \$11 million and \$7 million in ocean transportation.

\*\*\*\*\*

Public Law 480, Title I Agreement Signed With ZAIRE. On February 24, officials from the United States and Zaire signed a \$13-million Public Law 480, Title I agreement that will provide, on convertible local currency credit terms, approximately 85,000 tons of wheat valued at \$11 million and 5,700 bales of cotton valued at \$2 million.

USDA Reallocates GSM-102 Credit Guarantees for TURKEY; Separates Logs/Lumber Guarantees. On February 29, USDA reallocated \$13 million in credit guarantees to provide additional coverage for sales of vegetable oils (soybean, cottonseed, peanut, sunflowerseed, corn and linseed) to Turkey under the Export Credit Guarantee Program (GSM-102) in fiscal year 1988. This action increases the vegetable oils line from \$2.5 million to \$15.5 million and reduces the wheat line from \$32.5 million to \$19.5 million. In addition, USDA separated the \$7-million guarantee line previously authorized for sales of solid wood products (logs and lumber) into two lines. One provides \$4 million in guarantees for sales of logs and one provides \$3 million in guarantees for lumber.

#### WEEKLY EXCHANGE RATE DEVELOPMENTS

The U.S. dollar ended the week of March 4 generally mixed. In the absence of any economic trends this week--except for slight improvement in the U.S. unemployment rate--the dollar moved within a narrow range. The next major economic indicator to impact the dollar will be the release of the January U.S. trade data later this month.
